

BODY SYSTEMS

—

WILL

Skeletal System

Skull:

The skull is a strong bone that protects your brain.

Skeletal System

Rib Cage:

The rib cage protects your vital organs.

Muscular System

The muscular system causes the movement of the body.

Nervous System

When the brain receives a message from the body, the brain decides what to do with the information first.

Nervous System

You can protect your nervous system by wearing proper safety gear.

Respiratory System

The air we breathe passes through the trachea and into the lungs, with the help of the diaphragm.

Digestive System

The three jobs of the mouth are: taking in food, chewing food, and swallowing food.
