Increase our faith ... what a request!

I think most movies these days and even television shows display a world without much faith. Sometimes they show a person's greatest nightmares coming true.

When it comes to faith, Jesus asks us to step into a new realization... and more than that, a new reality, a new creation even.

This new creation includes both a confidence in God's power and the acceptance of what God can do given the circumstances that we face from day to day, that even our greatest nightmares are not in charge. Faith – confidence in God's power and acceptance of what God can do.

That's a new reality... a new creation that we are asked to live in. This is the Catholic notion of faith – a trusting confidence and a living acceptance of God and God's action.

May this Eucharist help the roots of our trust go deep... may this Eucharist help our acceptance move those roots on command.
